This is the version I was given a week ago. There's nothing new.

This was given to Jackie last Monday morning with a note from PRD and EFED saying that you wanted it moved asap. At the end of the day Dian gave it to me. I edited a bit and sent to you Tuesday morning. You approved and I sent it on to Linda. She wanted some more editing, which we did. Wed pm, she said she was ready to send to Wendy. On Thursday, Wendy said she would include it in her note about upcoming activities and say that it will go "next week." We still hadn't heard back from Wendy.

This morning, Anne prompted Jackie.

Linda provided something for Wendy's review last week. Is this a new version that needs to be considered?

Hi Debby, I reviewed the OPP Update on the Biological Evaluations for carbaryl, and methomyl and I concur on it. PRD and EFED have also concurred. Thanks, Jackie

Hi folks,

OPP management wants the OPP update for the methomyl and carbaryl draft BEs finalized ASAP so we can get the green light to push these docs out the door. Do you guys have comments/edits on the version we sent last week (attached)? Can we push this forward today?

Thanks,

Khue Nguyen

Hi ESA team,

Apparently we need the comms materials (OPP update) as close to final as soon as possible, given that the comms docs are needed in order to receive approval to release the draft BEs for carbaryl and methomyl. Khue, can you please track down the status of the OPP update and let FEAD know we need it ASAP in order to get clearance to release the draft BEs? Thanks.

Anita
